GOVERNMENT STRUCTURE

Sediment and Stormwater Branch

Each month one construction site that has maintained compliance with the Sediment and Stormwater Branch is chosen to be the **Site of the Month**. To be chosen for this honor, the site must stay in compliance with all Erosion and Sediment control plans, maintain a good working relationship with the inspectors, and be an overall example to the community.

The following is a list of previously chosen **Sites of the Month**:

The **December 2008 Site of the Month** is **The Estates of Autumn Woods**. Congratulations to Autumn Builders, Crouse Bros. Excavating and American Engineering! Vegetation was established on all inactive lots, and it makes the site look like a great place to live. Good work!
